Installation Guide

KILTER WALL LIGHT

Thoughtful lighting, responsibly designed in London.

Thank you for making the switch to Tala.
Discover the full Tala family at tala.co.uk

BEFORE STARTING

Please read instructions thoroughly before installation and keep them for future reference. Please take extreme care when dealing with electrical equipment. Improper assembly can undermine the safety and longevity of the product.

IMPORTANT

This light fitting must be connected to the supply earth. If your lighting circuit does not have an earth, ask a qualified electrician to provide an earth facility. This fitting operates on 240V mains voltage. Please visit our website to see our recommended dimmers. This product is suitable from use in bathrooms and outdoor locations*.

WARNING

Always switch off electricity supply at the mains during installation and maintenance. We recommend that the fuse is withdrawn or the circuit breaker is switched off whilst work is in progress. Do not just turn off at the wall switch. All fittings must be installed in accordance with current Building Regulations and IEE Wiring Regulations.

RECOMMENDED EQUIPMENT

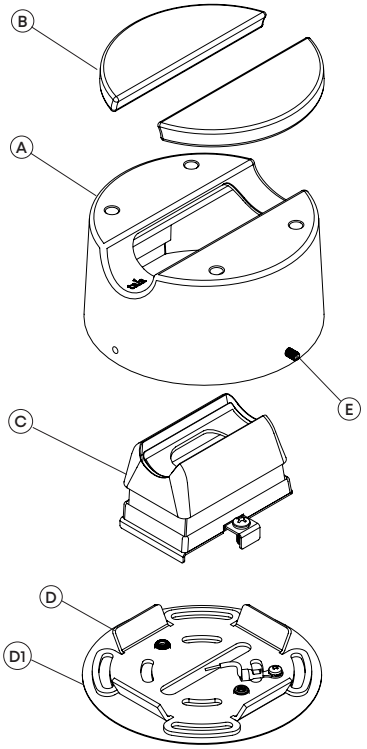

- Small flat head screwdriver
- Wire strippers
- Insulation tape

Further equipment may be required for fixing to your wall or ceiling

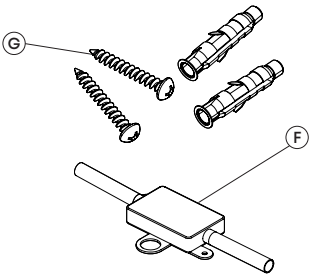

SKU - KLT-WL-XX-02-EU

IP44 220 - 240V

Kilter Wall Light - Provided Components

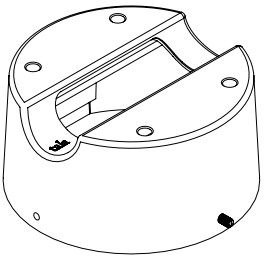

- (A) x1 Outer Shell
- (B) x2 Face plate
- (C) x1 Lamp Socket
- (D) x1 Wall Bracket
  - (D1) x1 Wall Seal
- (E) x2 Grub Screws
- (F) x1 Junction box
- (F) Screws and rawl plugs (Always use screws and plugs that are appropriate to the wall/ceiling)

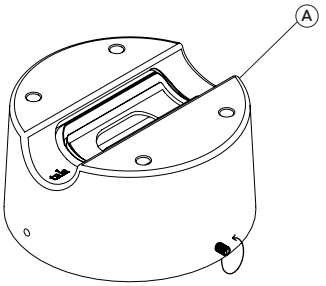

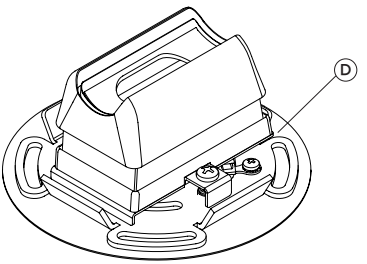

STEP 1

Unscrew the grub screws to release (A) from the assembly.

Once released, lift off the shell to reveal parts (C) and (D) .

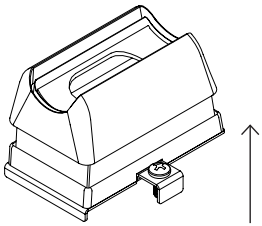

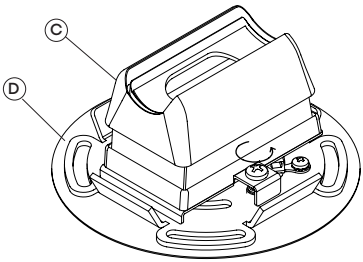

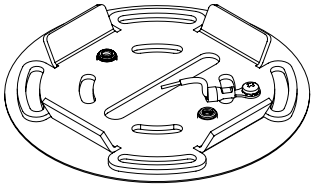

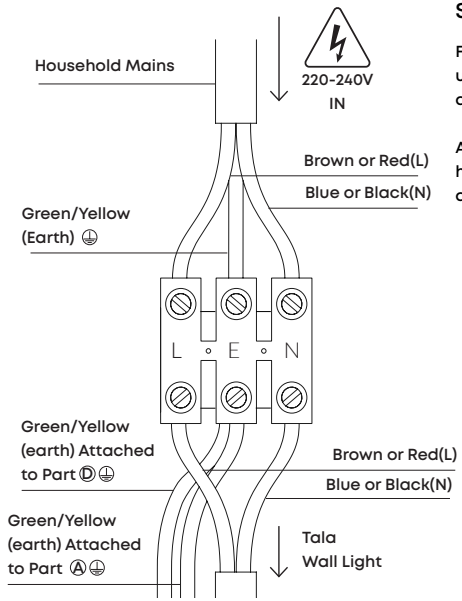

STEP 2

Loosen the screws from the sides of the lamp socket assembly (C) and remove from the wall bracket (D) .

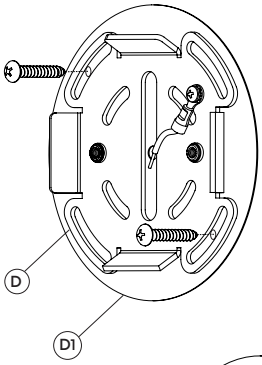

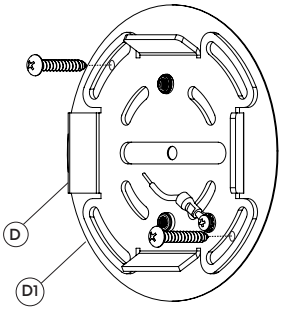

STEP 3

First identify your household wiring using current Building Regulations and IEE Wiring Regulations.

Attach the wall light wiring to your household supply as shown. Use an appropriate junction box.

STEP 4

Attach (D) to your wall or ceiling using screws and plugs. Ensure the central keyhole aligns with your wall cavity.

For horizontal configuration, ensure the bracket is mounted with the cable exit slot running horizontal as shown below.

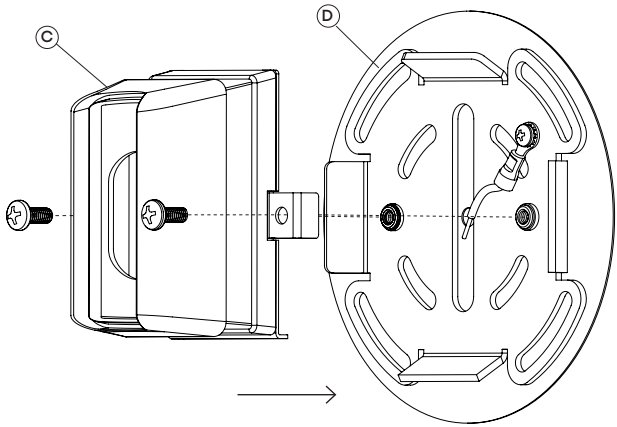

If required for the screw location, the Wall Seal (D1) can be pierced to allow for better screw alignment.

Always use screws and plugs that are appropriate to the ceiling/ wall type.

STEP 5

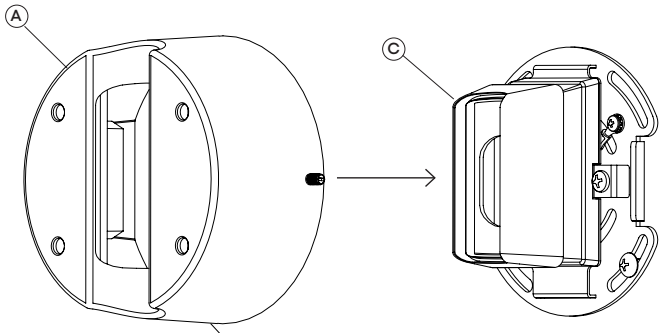

Place part (C) onto part (D) , making sure the holes line up with the rivets.

Return and re-tighten the side screws to secure in place.

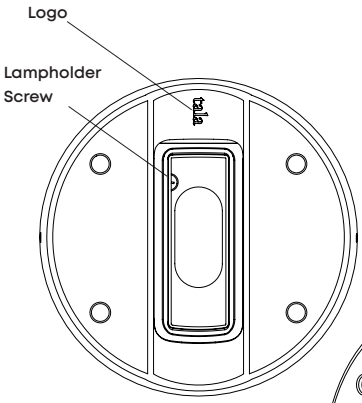

STEP 6

Place part (A) onto part (C). Ensure the grub screws are loosened to allow part (A) to mount flush on the wall.

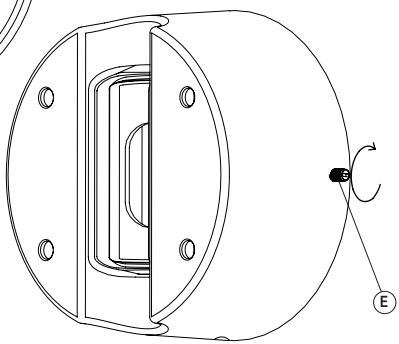

Ensure drainage hole is facing down and is unobstructed.

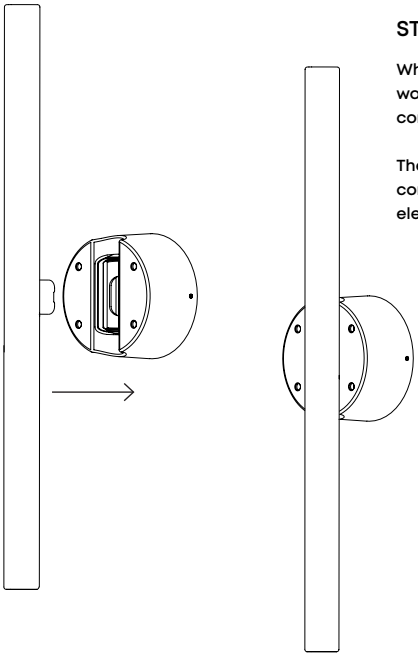

STEP 7

Ensure the Tala Logo is on the same side as the lampholder screw hole.

Tighten the Grub Screws (E) to secure in place.

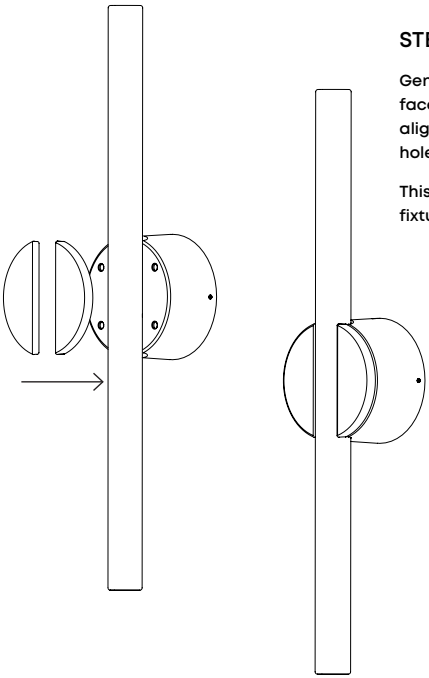

STEP 8

When inserting the bulb into the wall light, an audible click will confirm it is correctly in place.

The bulb needs to be firmly connected to the fitting to ensure electrical contact is made.

STEP 9

Gently but firmly push the faceplates (B) onto part (A) aligning the push pins with the holes.

This will secure the bulb in the fixture.

CARE AND CLEANING

We recommend cleaning with a soft dry cloth.
If required, further cleaning can be achieved with warm, soapy water.
Do not use abrasive materials as these will damage the lacquer.
Do not use alcohol or other solvents.

WARRANTY AND AFTER-CARE

This product has a two-year warranty. If there appears to be a functional defect with the product during this time, please contact our team at customerservice@tala.co.uk.

This symbol  indicates that electrical and electronic equipment (WEEE) should not be mixed with general household waste. For recovery and recycling, please take this product to a designated collection point where it will be accepted free of charge. Many retailers offer this in-store. Disposing of this product correctly will help save valuable resources and prevent any potential negative effects on human health and the environment.

*IP44 rated - providing protection against solid objects that are over 1mm and against water splashing from any angle.
